Bookly App (Clean Architecture) (Flutter)

Developed a book browsing app with modern UI and responsive design. Focused on clean architecture and state management using BLoC.

GitHub Link: https://github.com/SaifAllahGharib/book_app_clean_arch.git

Food Craft (Flutter)

Created an ecommerce food app with features for product browsing and smooth user experience.

GitHub Link: https://github.com/SaifAllahGharib/food_craft.git

Dates App (Android Native)

Developed an appointment scheduling app for the Ministry of Agriculture using Android Native with Java/Kotlin. The app allows managers to view appointments, secretaries to add, edit, and delete bookings, and includes details such as meeting location (inside or outside the ministry) and time.
